Zebrafish models in modern medicine From Bench to Bedside

Resource Faculty

Dr T. Rajan

Professor, Department of Anatomy
Aarupadai Veedu Medical College, Pondicherry

Workshop Overview

This workshop highlights the significance of zebrafish (*Danio rerio*) as an emerging model organism in modern biomedical and translational research. Participants will explore its applications in disease modeling, drug discovery, genome editing, regenerative medicine, and toxicology studies through expert sessions and interactive learning.

Who can Attend?

- * Postgraduates (MD/MS/PhD)
- * Researchers
- * Faculty Members
- * Biomedical Science Enthusiasts

Learning Objectives

- Understand the importance of zebrafish as a model organism in biomedical research
- Explore the applications of zebrafish in disease modeling and drug discovery
- Gain insights into genome editing techniques such as CRISPR-Cas9
- Learn the role of zebrafish in translational and regenerative medicine
- Familiarize with imaging, toxicology, and preclinical research applications

Registration

Fee ₹1500
